

# Performance Task Assessment Made Easy!

qAssess™ Software-as-a-Service (SaaS) allows educators to smoothly and effectively implement paper-based performance tasks or constructed-response assessments. These types of assessments allow students to display their work, showcase their critical thinking skills, and fully demonstrate their mastery of the subject matter—providing valuable insight to educators of students' progress toward learning. To manage the multiple steps required for paper-based performance task assessments, qAssess provides all of the online tools and uses a highly effective workflow.

qAssess is a unique assessment management SaaS that provides administrators, teachers, and content specialists an efficient way to print, scan, and score tests comprised of performance tasks or constructed-response items.
