

Data can be elusive and overwhelming at the same time—let us help you simplify and manage it.

Research & Evaluation Services

DATA ANALYSIS AND MANAGEMENT

Need help managing, interpreting, and understanding your data, but worry that educational research and assessment companies are too big and too busy to help you with your unique issues? Professional research, data management, and evaluation services from Educational Data Systems are easy to use and more affordable than you might think.

Our Research & Evaluation Services can assist you to:

- Track multiple indicators of student and school success
- Interpret formative assessment data produced by your SIS
- Project enrollment to help with planning for the next academic year
- Examine relationships between local assessment scores and state-wide summative assessment scores
- Analyze complex data and produce meaningful reports on district-specific research questions
- Drill deep into assessment, demographic, and school-climate data for unique insights based on sub-group and geospatial analysis
- Collect and manage data from multiple sources to provide accurate blended data files

Our experts have the ability to produce relevant and timely resources that directly impact teaching, learning, and student success.

It's easy to get started:

1. Establish your problem and/or need. If you're not sure, take advantage of our free initial consultation.
2. Call us or visit eddata.com.
3. Sign up for a packaged or à la carte price plan to get started on your first project.

Benefits of hiring Educational Data Systems as your research & evaluation experts:

- Supplement your own staff's knowledge with our on-call experts
- Reduce overhead costs by using only the consulting time you need
- Address questions or problems that are specific to your district
- Add flexible capacity to your staff to get more work done in less time
- Provide a third-party, unbiased perspective on identifying problems and potential solutions

If you need help managing, using, or understanding your volumes of data, we are here to help; that's our profession. Our goal is to make it easy on you to get answers.

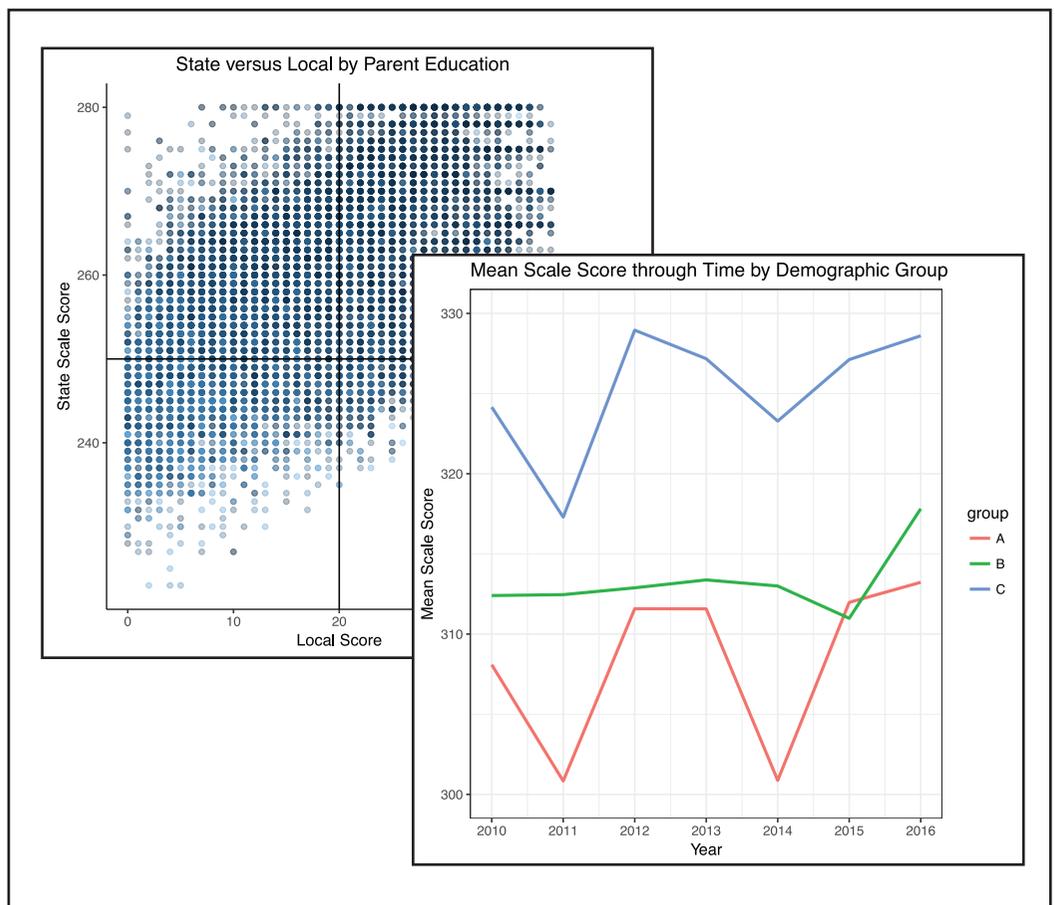

Two Pricing Structures:

1) Packaged Services

Pre-purchase units by the hour, based on how big your project is or by how many projects you have. If you don't use all of the time, save it for the next project.

2) À La Carte Services

Pay as you go; we bill our time in increments of one quarter of one hour. This way you only pay for exactly what you need, and nothing more.

We have experience delivering a variety of consultative services to school districts and state departments of education. We're like your in-house statistician—call us any time to discuss data or to start a new project!
